GUNDERAYA PATIL

Java FullStack Developer

+91 6363023501 gundupatil9741@gmail.com

PROFILE HIGHLIGHTS

Highly motivated and enthusiastic Java fullStack Developer with over **4 years and 1 months** of experience, possessing a comprehensive grasp of web services technologies, particularly REST and a solid foundation in Agile methodologies. Demonstrated proficiency in Java 8, Spring Boot, Object-Relational Mapping (ORM) using Hibernate/JPA. Skilled in seamlessly integrating third-party APIs, executing CRUD operations, and developing robust unit and integration tests. Deep knowledge in core Java, J2EE, and proficient in applying design patterns. Recognized for strong problem-solving abilities and a keen interest in coding for highly scalable systems. Exceptional communication and teamwork skills round out a profile dedicated to excellence in backend development.

JAVA DEVELOPMENT SKILLS

- Java Developer with a strong Java foundation and adept understanding of **OOP** concepts.
- Proficient in handling **exceptions** within the Spring Boot framework. Proficient in Spring and
- Spring Boot frameworks, encompassing expertise in **MVC architecture, Dependency Injection, Microservices, web services, and Spring Validations.**
- Extensive expertise in **Spring MVC, Spring Data JPA, API Development, Spring ORM, JPA, Hibernate, Rest Controller, Service layer, and Repository layer.**
- Experienced in developing **RESTful APIs** with JSON data flow, utilizing **Postman** for **API testing**, **pagination** and **sorting**.
- Solid understanding of **MySQL** and **Hibernate/JPA** for database management.
- Implements **Spring Security** with expertise in **JWT token** authentication for robust and secure application development.
- Applies **Model Mapper** for streamlined and effective object mapping, enhancing the efficiency of data handling in applications.
- Experience in using well-known Java development tools like I**ntelliJ IDEA, Eclipse,** and **Spring Tool Suite (STS)** to write code.
- Experience in using **Maven** build tools for managing project dependencies and creating deployment artifacts.

TECHNICAL EXPERTISE

- Core Java
- Java 8 features
- Spring Boot
- Hibernate JPA
- API/Webservices
- JSP
- Spring Security
- JWT Token
- MySQL
- Swagger
- Postman
- Spring Cloud
- Kafka
- Spring MVC
- Angular
- Typescript
- Servlets
- Microservices
- PostgreSql
- AWS
- Solid Principles
- Maven
- Git & GitHub
- JIRA
- PostgreSQL

PROFESSIONAL EXPERIENCE

TotalExperience : **6Months**
Company Name : **Global Logic**
Designation : **Software Engineer**
Duration - **23jan2025 - 17july2025**

Total Experience : **3.7 years** Company Name : **FuGenX Technologies**
Designation : **Java FullStack Developer**
Duration - 20Jun2021 - 20Jan2025

PROJECT DESCRIPTION

Hotel Hub – Online Hotel Booking Platform

Developed robust userauthentication andauthorization modules utilizing Spring Security. Integrated third-party APIs to automate booking confirmations and notifications. Created RESTful services with Spring MVC and optimized data persistence using JPA and MySQL. Conducted backend unit testing and collaborated within an Agile environment.

NSDC Implementation – Government Skill Development Project

Developeda centralizedNSDC platform tomanageuserregistrationand skill program operations, implementing secure OTP-based onboarding with role/group assignment, JWT authentication, and Spring Security. Built modules for training partner onboarding (document verification, sector tagging, geographic mapping), program enrollment, batch scheduling, and candidate tracking. Designed admin dashboards for real-time metrics, integrated email notifications, and maintained audit logs for user activity. Utilized Java 17, Spring Boot, Hibernate, JPA, PostgreSQL, Maven, Postman, and Git for development and management

ROLES AND RESPONSIBILITIES

- Designed and implemented entity classes based on requirement documents and **ER diagrams**, ensuring accurate mappings and relationships.
- Developed **services** and **controller layers** for respective module development, utilizing **Spring MVC** for **Rest API** development.
- **File Handling and Storage:** Utilized **AWS S3** for secure, scalable storage and retrieval of hotel images, booking receipts, and user documents, ensuring efficient data management and high availability.
- Implemented data validation using **Spring Validation**, ensuring data integrity and reliability.
- Leveraged JPA Repository and Crud Repository for **CRUD operations** on the entity layer, optimizing database interactions.
- Integrated third-party APIs for **OTP generation** and **SMS/email** notifications, enhancing system functionality.
- Proficient in **debugging** projects, resolving issues promptly to ensure smooth development processes.
- Demonstrates effective collaboration with other developers using tools such as **GIT** and **GitHub** for code repository management branching, and merging.
- Utilized **Java 8** features such as **Lambda expression, Stream API** and **Optional class** enhancing code efficiency and readability.
- Analyzed ER diagrams in **MySQL Workbench**, ensuring accurate representation of database structures.
- Prepared comprehensive **API documentation,** enhancing project **maintainability** and usability.
- Developed **Angular 14**-based **login** and **logout** functionality, implementing authentication flows, session/token handling, route guards, and secure interaction with backend REST
- APIs.Implemented JWT-based **authentication** integration between **Angular** frontend and Spring Boot backend to ensure secure access control.
