KALPESH PATIL

Dedicated **Software Engineer targeting challenging Senior Software Engineer / Senior Analyst roles in Software Development and Java Back-end Engineering, focused on Pune, Mumbai, or Remote opportunities to deliver scalable, cloud-based, and high-performance enterprise solutions.**

+91-9595756030 kalpesh.patil756030@gmail.com LinkedIn

PROFILE SUMMARY

- **A keen Software Engineer** with nearly 4 years of experience in delivering **robust, cloud-enabled Java and Spring Boot applications** for enterprise clients, currently working as Software Engineer at LTIMindtree Limited
- Provided **client-facing technical support**, directly coordinating with stakeholders during production issues, requirement clarifications, and post-deployment validations.
- Owned a **single client application end-to-end**, acting as the primary point of liability for design decisions, upgrades, deployments, and stability.
- Independently led Java platform modernization across **Java JDK 11 to Java JDK 21**, ensuring backward compatibility, controlled rollouts, and zero critical downtime.
- Hands-on expertise across multiple Java versions, including managing deprecated APIs, JVM behaviour changes, and long-term support considerations.
- Actively governed code quality and technical debt, driving continuous refactoring and maintainability improvements using static analysis insights.
- Worked with AWS services through hands-on implementation and lab-based validation, applying cloud concepts directly to project environments.

CORE COMPETENCIES

- **Software Development Lifecycle**
- **Back-end Engineering**
- **Cloud Solutions & Deployment**
- **Microservices Architecture**
- **Performance Optimization**
- **RESTful API Development**
- **Agile & Scrum Methodologies**
- **Scalability & Reliability**
- **Database Design & Optimization**
- **Code Quality & Refactoring**
- **Cross-Functional Collaboration**
- **Client Requirement Analysis**

EDUCATION

- **Bachelor of Engineering, (Chemical Engineering) Sir Visvesvaraya Institute of Technology, Nashik, Maharashtra – July 2021**

WORK EXPERIENCE

Software Engineer
LTIMindtree Limited – Pune, Maharashtra, June 2022 – Present

- Owning **end-to-end application answerability**, including requirement clarification, technical decision-making, deployment readiness, and post-release stability.
- Delivering end-to-end **Java and J2EE web applications** adhering to enterprise standards, design guidelines, and **SOLID principles**.
- Migrating **company-level client application**, ensuring backward compatibility, zero downtime, and minimal production impact.
- **Optimizing** SQL queries, **Hibernate/JPA performance**, and reduced API response time by **30%**; minimized data redundancy by **90%**.
- **Developing REST/JSON APIs** with Spring Boot, Spring MVC, JWT-based authentication, and secure role-based authorization.
- **Enhancing** code quality, performance and monitoring using **SonarQube, SonarLint, and logging frameworks**.

TECHNICAL SKILLS

- **Programming Languages:** Java 8, Java 11, Java 21, J2EE, SQL, Typescript
- **Back-end Technologies:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Hibernate, REST/JSON Web Services
- **Front-end Technologies :** Angular, HTML5, CSS3, JavaScript
- **Databases :** MySQL, Microsoft SQL Server, PL/SQL
- **Cloud & DevOps :** AWS (EC2, S3, RDS, Lambda), CloudFormation, Docker, Terraform, Jenkins
- **Messaging & Streaming** : Kafka
- **Testing :** JUnit, Mockito, Unit & Integration Testing
- **Tools :** Git (branching, tagging, merging), Maven, SonarQube, SonarLint
- **Methodologies :** Agile/Scrum, CI/CD, Microservices Architecture

PROJECT

WEBAPPS – Travel, Transport and Hospitality, Amadeus IT Group | Jan 2023 – Present

- Led Java JDK migration from Java 11 to Java 21, ensuring backward compatibility, stability, and minimal production downtime.
- Refactored legacy code to resolve deprecated APIs, JVM compatibility issues, and module system changes.
- Designed and developed a web application using Java, J2EE, Spring Boot, Microservices, Angular, and MSSQL to manage Amadeus customer services.
- Implemented REST/JSON APIs with secure role-based access using Spring Security and JWT.
- Designed database schemas and optimized SQL queries using JPA, Hibernate, JDBC, indexes, and stored procedures.
- Deployed applications on AWS (EC2, RDS, and S3) with Jenkins-based CI/CD pipelines.
- Enhanced performance, monitoring, and code quality using logging frameworks and SonarQube

CERTIFICATIONS

- **AWS Certified Developer – Associate**
- **GenAI foundation Course**

AWARDS & RECOGNITION

- **Excellence Award** – Vice President, LTIMindtree (Amadeus Account): Recognized for exceptional contribution to enterprise application modernization, delivering high-impact outcomes.
- **Spot Award – Project Director, LTIMindtree** : Awarded for critical problem-solving and rapid delivery during high-priority project milestones, ensuring minimal production impact and adherence to strict timelines.
- **Super Crew Award – Project Director, LTIMindtree**: Honored for consistent ownership, collaboration, and execution excellence within cross-functional teams supporting complex client deliverables.
- **Shooting Star Award (Q4 FY25) – LTIMindtree:** Recognized as a top-performing Engineer for outstanding technical contribution, reliability, and sustained impact on production stability and client satisfaction.

PERSONAL DETAILS

- **Date of Birth:** 14th June 1999
- **Languages Known:** English, Hindi
- **Location:** Pune, India
